PROFESSIONAL SUMMARY

Technical Project / Product Manager backed by 11 years of experience eliciting requirements and managing relationships directly with business owners and C-level decision-makers, combined with hands-on Fullstack software engineering. Owned the discovery-to-release lifecycle end to end on a real estate platform: stakeholder interviews, MVP scoping, roadmap prioritization across epics and user stories, rapid AI-assisted prototyping, UAT coordination, and user onboarding. Strong technical fluency to align cross-functional engineering teams, estimate effort, and deliver business outcomes within Agile/Scrum environments. C1 Advanced English and Intermediate Portuguese.

PROFESSIONAL EXPERIENCE

Technical Product Manager & Fullstack Developer *Freelance - Remote*
J.M. Miranda Propiedades *Jan 2026 - Oct 2026*

- Led end-to-end product discovery and delivery with the agency's owner and staff, culminating in a successful production launch (live at https://www.jmmiranda.com.ar/); audited the legacy PHP system to eliminate operational bottlenecks and security gaps, raising the Lighthouse performance score from 70% to 100%.
- Defined MVP scope, effort estimates, and product roadmap across 4 epics, translating business rules and role-based permissions into structured user stories, acceptance criteria, and a PostgreSQL/Supabase data model.
- Accelerated stakeholder alignment by leveraging AI-assisted tooling (Cursor, v0) to turn requirements into navigable prototypes within hours, validating scope in person with the client before committing engineering effort.
- Managed staging releases and led User Acceptance Testing (UAT) with the client's team, triaging 15 reported cases into defects vs. scope gaps; spearheaded a UX redesign of the property intake workflow that cut entry time from 9 to 4 minutes.
- Built and maintained the project's internal Wiki (ADRs, business rules, operational workflows) and delivered step-by-step Scribe walkthroughs after each demo, driving seamless adoption across 5 non-technical back-office users.

Web Developer *Remote*
Flywheel Studio *Feb 2026 - Sep 2026*

- Collaborate across the full delivery lifecycle of a multi-platform logistics solution (web admin portal in Next.js/Supabase + mobile app alongside a Flutter team) for a marketplace client operating third-party managed lockers.
- Provide technical effort estimates, refine requirements with acceptance criteria, and actively participate in Scrum ceremonies, sprint planning, and Pull Request reviews within an Agile team of 4.
- Integrate AI models via the Vercel AI SDK to automate operational workflows within an internal project management web application.

Web Developer *Freelance - Remote*
Outland *Feb 2026 - Mar 2026*

- Coordinated the technical migration of a corporate website from WordPress to React with minimal downtime, ensuring continuous digital brand presence.
- Scoped and implemented Sanity CMS to empower non-technical client teams with autonomous content management, leading sprint progress reviews and live product demos with stakeholders.

Frontend Developer *Freelance - Remote*
Método John Mojica *Mar 2025 - Feb 2026*

- Gathered client requirements, defined UX workflows, and led product demos for an e-learning platform, iterating on features based on direct stakeholder and end-user feedback.

- Coordinated API contracts and response schemas with the Java backend team while leading React/Next.js frontend architecture, cutting page load times by 0.8s across core routes.

UX Developer *Argentina*
Making Sense LLC *Mar 2024 - Sep 2025*
- Acted as a key liaison across UX designers, backend engineers, and stakeholders to ensure deliverables matched business rules, functional specs, and visual standards.
- Documented components functionally and technically in Storybook and Confluence, reducing implementation overhead and enabling design system reuse across 2 additional projects.
- Managed iterative functional testing cycles to validate complex product increments directly with the client prior to release.

Teaching Assistant *Part-time - Remote*
SoyHenry Bootcamp *Feb 2024 - May 2024*
- Coordinated, mentored, and tracked the technical progress of 40+ students in fullstack development, facilitating daily standups, workshops, and technical mock sessions.

Commercial Account Executive *Buenos Aires, Argentina*
Banco Credicoop Coop. Ltdo. *2012 - 2023*
- Owned end-to-end B2B client relationships for 11 years, eliciting complex business needs from company owners and C-level directors to deliver tailored financial solutions.
- Resolved conflicting priorities across clients, internal operations, and risk compliance, negotiating scope, timelines, and expectations directly with executive decision-makers.
- Analyzed operational workflows and financial structures across corporate portfolios, translating complex technical and financial concepts into clear, actionable plans for stakeholders.

SKILLS & COMPETENCIES

Product & Project Management: End-to-End Delivery, Discovery & Requirement Elicitation, MVP Scoping & Effort Estimation, User Stories & Acceptance Criteria, Process Mapping (As-Is/To-Be), UAT & Defect Triage, Stakeholder Management
Methodologies & Delivery: Agile (Scrum), Sprint Planning, Product Demos, Conflicting Priority Resolution, Release Support, Git Flow, CI/CD
AI-Assisted Delivery: Cursor, v0, Vercel AI SDK (rapid prototyping for stakeholder validation, workflow automation, and technical spec generation)
Tools & Platforms: Jira, Confluence, Notion, Scribe, Excalidraw, Mermaid, Storybook, Postman, Git, Vercel, Supabase
Technical Foundations: TypeScript, JavaScript, React, Next.js, Node.js, SQL, PostgreSQL, Relational Data Modeling, REST APIs
Languages: Spanish (Native), English (C1 / Advanced), Portuguese (Intermediate)

EDUCATION & CERTIFICATIONS

SoyHenry Bootcamp, Argentina *Dec 2023 - Apr 2024*
Fullstack Web Development

HIGHER EDUCATION

Universidad Nacional de las Artes, Argentina *2018 - 2026*
Bachelor's Degree in Acting
